-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 19 December 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/19/08 has been entered.

Claims 38-48 are under examination.

### ***Information Disclosure Statement***

The information disclosure statement, received 12/19/08, is acknowledged. A signed copy is enclosed hereto.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 38-48 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a method for treating diabetes in a diabetic subject, the method comprising administering to the subject an effective amount of a heterocyclic carbonyl glycine compound which inhibits HIF hydroxylase, thereby treating the diabetes, does not reasonably provide enablement for a method for treating diabetes in a diabetic subject, the method comprising administering to the subject an effective amount of a HIF hydroxylase inhibitor,

thereby treating the diabetes. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

In this regard, the application disclosure and claims have been compared per the factors indicated in the decision *In re Wands*, 8 USPQ2d 1400 (Fed. Cir., 1988) as to undue experimentation. The factors include:

- 1) the nature of the invention;
- 2) the breadth of the claims;
- 3) the predictability or unpredictability of the art
- 4) the amount of direction or guidance presented;
- 5) the presence or absence of working examples;
- 6) the quantity of experimentation necessary;
- 7) the state of the prior art; and,
- 8) the relative skill of those skilled in the art;

Each factor is addressed below on the basis of comparison of the disclosure, the claims and the state of the prior art in the assessment of undue experimentation.

The claimed invention is drawn to a method comprising administering to the subject an effective amount of a HIF hydroxylase inhibitor, thereby treating the diabetes.

The breadth of the claims is excessive with regard to claiming a method comprising administering to the subject an effective amount of a HIF hydroxylase inhibitor, thereby treating the diabetes. Applicant has only provided guidance for the use of a heterocyclic carbonyl glycine compound which inhibits HIF hydroxylase, thereby treating the diabetes.

Applicant have provided no guidance of any other ingredient which act as a HIF hydroxylase inhibitor. In absence of evidence to the contrary, it would not be expected that any and all ingredients would act as a HIF hydroxylase inhibitor, other than a heterocyclic

carbonyl glycine compound which inhibits HIF hydroxylase. Furthermore, it would not be predictable to the artisan which ingredient that inhibits HIF hydroxylase would work in the present invention, nor would it be predictable to the artisan which pathologies could be treated with these ingredients that act as a inhibitory substance.

In consideration of these factors, it is apparent that there is undue experimentation because of a variability in prediction of outcome that is not addressed by the present application. Absent factual data to the contrary, the amount and level of experimentation needed is undue to practice the invention as claimed.

Accordingly, with respect to the elected invention, others skilled in the art would be unable to practice the invention as claimed without undue experimentation and with a reasonable expectation of success, other than the use of a heterocyclic carbonyl glycine compound which inhibits HIF hydroxylase, thereby treating the diabetes to provide the functional effects instantly claimed, as shown in the instant specification, page 36, paragraph 137- page 37, paragraph 138.

All other claims depend directly or indirectly from rejected claims and are, therefore, also rejected under 35 U.S.C. 112, first paragraph for the reasons set forth above.

### ***Conclusion***

All claims are rejected.
